

Memorandum

To: Citizens of Excelsior

From: City of Excelsior

Re: Excelsior MS4 Program
and SWPPP

A Municipal Separate Storm Sewer System (MS4) is a conveyance, or system of conveyances (i.e., municipal streets, catch basins, curbs, gutters, ditches, channels, etc.) that is designed to collect stormwater and is owned and operated by a public entity. Stormwater from an MS4 is regulated under the National Pollutant Discharge Elimination System (NPDES) MS4 permit to reduce pollution from conveyance systems. Excelsior is a MS4 and is required to minimize pollutants that enter their systems through a Stormwater Pollution Prevention Plan (SWPPP). Each SWPPP includes six minimum control measures (MCM) that address the following areas:

1. Public education and outreach
2. Public participation and involvement
3. Illicit discharge detection and elimination
4. Construction site stormwater runoff control
5. Post-construction site management
6. Good housekeeping and pollution prevention

In order to comply with a section of MCM 2, the poster board providing information on the work and implementation of the City's MS4 program in 2020 will be available for viewing on the City webpage. For each MCM, descriptions will be given on what the City did during the year to comply with the permit. The City must also offer an opportunity for the public to provide input on the adequacy of their SWPPP; to citizens who wish to supply comments on the City's SWPPP, please email comments to Public Works Superintendent Tim Amundsen at tamundsen@excelsiormn.org. If you have any further questions or concerns, please contact the City at 952-474-5233.
