

# Recorded Q&A for Excelsior Potential Utility Relocation Informational Virtual Open House Meeting - Questions & Answers

Item #	Question	Response
1	Will eminent domain be utilized for installing the transformers?	No, we would not go to those extremes. If even one business owner does not agree with the plan, the Excelsior Project Team will create a different plan. Once a plan is agreed upon, then it would go to Council. Should the cost be too much, then Council may not approve the undergrounding.
2	Was it investigated to install the transformers on public property, rather than private property?	The ideal location would be to install the transformers as close to the buildings that would be undergrounded as possible. Based on conversations today, our next step will be to investigate installing the transformers on public property, farther away from the buildings that may be undergrounded.
3	Will this presentation be available online?	Yes, we have recorded the presentation and will post in on the City's website.
